

- Notes**
- All measurements (road widths etc) taken from OS maps only.
 - Narrow (235mm) Cycle Lane defenders (2m in length) to be installed at 2m intervals where possible. Existing vehicle access to properties should not be compromised in any way. Exact location of each lane defender to be agreed on site with SMBC representative prior to installation.
 - New signs to be erected on existing lighting columns or sign posts where possible. Signs to have minimum 2.4m clearance.
 - Cycle lane/carriageway widths shown are approximate and must be confirmed and agreed on site with the Sefton Council site supervisor
